January 17, 2023

Memorandum For MIL-DTL-38999 Qualified Manufacturers, Assembly Houses and Value-Added Distributors.

SUBJECT: Clarification of requirements in MIL-DTL-38999M Amendment 2, Cavity Leakage test.

Over the past few years several companies listed on QPL-38999 have received unofficial email and/or verbal communications from DLA personnel that the requirement to perform the Cavity Leakage test (paragraph 3.48 in the subject specification); commonly known as the cavity-to-cavity leakage test is no longer required. The information given is erroneous and not supported by required official written notification from the DLA Land and Maritime Document Standardization Division Chief (the Preparing Activity for the MIL-DTL-38999 specification). Any unofficial notification of this relief is hereby formally rescinded and is null and void as of the date of this memorandum.

The requirement to perform the Cavity Leakage test was never removed from the MIL-DTL-38999 specification and is a valid requirement applicable to both Initial Qualification testing and Group C Periodic testing. Any MIL-DTL-38999 qualified manufacturer that has not been performing the required Cavity Leakage testing shall perform the testing as required in the specification as of the date of this letter.

If there are any questions regarding this issue, please contact Abdonasser Abdouni, Branch Chief of the Interconnection Branch at 614-692-0565 (abdo.abdouni@dla.mil), or Jacob Bender, project engineer for MIL-DTL-38999 at 614-692-9185 (jacob.bender@dla.mil).

Sincerely,

// **SIGNED** //

CHARLES SAFFLE
